

Data Analysis Project Evaluation

Projects will be assessed on each of 5 criteria as follows (weightings are indicated in brackets):

Objectives (10%): Are the objectives of the analysis clearly described?

Data collection (10%): Is the source and the manner of data collection clearly described?

Description (35%): Is the data described in a concise and meaningful fashion, making appropriate use of summaries, tables, graphs, etc.?

Formal analysis (25%): Are appropriate (basic) methods applied?

Findings (20%): Are the findings deriving from the analysis clearly described in terms relevant to the objectives?
